What does the Family Resource Center mean to you and your family:

Family Resource Center (FRC) has been to me a lot more than a resource center. Family Resource Center is family to me. Every member has incredibly helpful. As a first time mother I have had the need of support to make sure I do the best for my child. FRC has been there for me during every milestone my child has gone through. All the members are characterized by their excellence. Their work ethic and enthusiasm makes coming to their groups a truth pleasure. Is evident that children and parents enjoy deeply these groups.

Thanks to FRC my daughter has been exposed to countless educational opportunities; gross motor and fine motor skills as well as intellectual stimuli that have greatly benefit my child's development. The home visits have enabled my daughter to improve her interpersonal relationships with Rebecca Murray. Rebecca Murray and Laurie Larsen have work together to share their knowledge with numerous families. Without them many children would not have the opportunity flourish as my daughter has.

Sincerely,

Carolina DeLaire
